# MARION COUNTY SOLAR PROJECT

---

February 2025  
Issue 2

## Hello neighbor!

As winter has settled in, we wanted to reach out and provide a construction update regarding Marion County Solar Project.

Much of the site groundwork has finished, and we have moved into the installation phase of the project, beginning with pile installation.

Site photo showing installed piles (January 14, 2025)

With this new phase, an increase in worker and equipment activity is required.

You may have noticed an uptick in vehicle traffic on local access roads as piles are delivered as well as a moderate increase in noise during construction hours as piles are driven into the ground.

It is likely that convenience stores, equipment rental companies, machine shops, parts suppliers, hotels, and restaurants will also experience an increase in customer volume as more of our team will be patronizing local businesses.

Thank you for your patience as we enter this new phase of activity -- we're getting there!

We are committed to being a good neighbor, so please don't hesitate to contact us directly if you have any questions, comments, or concerns at [connect@MarionCountySolarProject.com](mailto:connect@MarionCountySolarProject.com) or (888) 652-4105.

Also, please feel free to visit [MarionCountySolarProject.com](http://MarionCountySolarProject.com) or follow us on Facebook at Marion County Solar Project for facts about the project.

Sincerely,

*Jillian Still*
